Ramgarh, Jharkhand, India

## EXPERIENCE

### • Coding Blocks

June 2024 - November 2024

Full-Stack Developer - Apprenticeship

New Delhi, India

- Maintained active involvement in the project through Nov 2024 following the training period.
- Led a 3-person team and collaborated in the development of the PolyLingua multilingual language translator, utilizing REST API to achieve real-time and accurate multi-language translations.
- Achieved a 30% reduction in user errors, improving the translation reliability and user experience.
- Enhanced communication across 90+ languages, ensuring seamless interaction in diverse environments.
- Presented at the University Project Showcase, earning positive feedback for UI and usability.

## EDUCATION

### • GLA University

Sept 2022 - June 2026

Bachelor's in Computer Science Engineering

Mathura, India

### • Holy Cross School

July 2019 - June 2021

Intermediate

Ramgarh, India

## PROJECTS

### • PriceLens – Product Price Intelligence Platform

Jan 2026 - June 2026

Tools: React.js, Vite, Node.js, Express.js, MongoDB, Redux Toolkit, Redis, BullMQ

- Built a scalable full-stack price comparison platform using 8+ technologies.
- Developed 15+ RESTful APIs for authentication, products, reviews, and URL-based price tracking.
- Engineered web crawling and scraping pipelines to aggregate, classify and normalize product data for cross-platform comparison.
- Optimized JWT authentication, Redis caching, and BullMQ queues for scalable background processing.
- Designed 20+ reusable React components using Redux Toolkit and TanStack Query.
- Analyzed product URLs and page structures to improve scraping accuracy and data quality.

### • Workflow-Driven Hospital Management System

March 2026 - April 2026

Tools: React.js, Vite, MongoDB, Node.js, Express.js

- Developed a full-stack hospital management system supporting 100+ patient records and appointment workflows.
- Integrated RESTful APIs handling authentication, scheduling, and data operations with average response time under 200ms.
- Implemented role-based access control for 3 user roles (Admin, Doctors and Patients), ensuring secure data access.
- Architected React.js interfaces enabling real-time slot booking, reducing manual scheduling conflicts by 30%.
- Secured the application using JWT authentication, reducing unauthorized access risks.

## SKILLS

- **Programming Languages :** Java, JavaScript, Python, C, Object-Oriented Programming
- **Frontend Development :** HTML, CSS, Tailwind CSS, React.js
- **Backend Development :** Node.js, Express.js, REST APIs, JWT, Redis, FastAPI
- **Database & Cloud :** MongoDB, MySQL, Vercel, Render
- **State Management :** Redux Toolkit, TanStack Query
- **Developer Tools :** Git, GitHub, Linux, Postman, Selenium, Playwright, Agile, SDLC, Software Testing

## CERTIFICATIONS

- **Infosys Springboard:** Data Structure & algorithms in Java, DBMS, Software Engineering May 2025
- **Cisco Network Academy:** Switches, Routing, Wireless Networking, Network Security April 2025
